Tactile Signs & Lettering

Always contrast your graphics with the background color.

We recommend the use of very light characters on dark backgrounds or the use of *High-Glow* photoluminescent material. Popular color choices are Black, Charcoal Gray, Burgundy, Green, Dark Brown, Air Force Blue or Cinder.

Tactile letters and graphics are standard Rowmark applique colors of Bright White, Warm White or tints of Gray, Ivory and Sand. Many types and sizes of staircase ID signs and Exit Access signs are available. We offer signs that comply with ADA, California Building Code Section 1003.2.8.6 and ICC/ANSI A117.1 Accessible and Usable Buildings and Facilities. Please contact us if you need custom ADA signs of any kind.

Photoluminescent Option: *Glow-in-the-Dark* ADA Compliant - Tactile Lettering with Raster 2 Braille
